

## Product List

SECTION 1	COATING & MEMBRANE SYSTEMS	
ACRYL VA	Encapsulation coloured coating for asbestos sheets	Finishing coat of encapsulation treatment with long lasting fade free colours, UV and heat ageing resistance with algae and fungal protection
ARENAPAVE	Sports & industrial surface Coating	Finishing coat for tennis courts, cricket pitches, other sports fields, industrial floors, walkways, boat decks etc. with cushioning and rebounding effect
ASBESTOBOND	Encapsulating coating for asbestos sheets	Initial coating of encapsulation treatment for asbestos to prevent mould growth and emission of asbestos fibre
ASBESTOSHIELD	Encapsulation coloured coating for asbestos sheets	Finishing coat of encapsulation treatment with long lasting fade free colours, UV and heat ageing resistance with algae and fungal protection
ATTAFLEX	Protective membrane coating	Waterproof membrane coating. decorative and trafficable coating for cobble paving, driveways, pool decks, factory floors and walls
CORROPEL	Water based anti corrosion coating	Initial coating for steel, aluminium, galvanized iron as a corrosion prevention coating
DEFIANCE	Anti foul water based coating	Protective coating for steel, aluminium, rubber or timber against sea water on ships and other marine structures
FLEXITEX	Flexible styrene acrylic PVC membrane coating	Elastomeric membrane coating for walls and roofs with textured or smooth finish
INSULCOTE	Insulating roof and wall coating	Insulating coating for tile, asbestos, zinc-alumn, cement fibre sheets, brickwork
LIQUID MASK	Water based rubber protective Membrane	Peelable water based rubber protective coating for substrates which require masking
PLICRETE	Waterproof coating	Coating for direct application on substrates for positive or negative water proofing

SAFETY DECK	Fine rubber particle texture	Anti-slip, stone damage resistant protective coating for boat decks, floors, caravans, trailers
SUTTLETEX	Rubber particle texture wall Coating	Attractive, non-abrasive, supple attractive, resilient texture coating
TUFLOAT	Water based coloured coating	Coloured coating for cement and clay roof tiles with long lasting fade free colours, UV and heat ageing resistance with algae and fungal protection
VULFLOW	Peelable rubber mould system	Used to produce strong exact replica with negligible shrinkage
<b>SECTION 2</b>	<b>SEALERS</b>	
ARMOURSHIELD	Polyester acrylic sealer	Protective sealer for conventional paints, concrete carbonation and withering of bricks
ASBESTOSEAL	Encapsulating penetrating asbestos binder	Initial coating of encapsulation treatment for moss infested asbestos sheets
BRYLCOTE	Very hard acrylic sealer and coating	Extremely hard coating for concrete, terracotta or ceramic tiled floors with exceptional wear and chemical resistance
BRYLSEAL	Penetrating hard acrylic binder sealer	Hard initial coating for concrete, terracotta or ceramic tiled floors with exceptional adhesion wear and chemical resistance
CALSEAL	Resilient acrylic wax sealer coating	Clear sealer for brick or limestone walls, graffiti protective coating with exceptional toughness
DEVILLECOTE	High build ultra hard water based acrylic Sealer	Clear or coloured extremely hard high-build film sealer for concrete, timber, particle board, ceramic tiles
ELASTATAK	Elastomeric high-tack acrylic sealer and Coating	Elastic flexible initial coating for zinc-alumn, galvanized, timber, chip-board, cement rendered substrates
FUNGATROL	Acrylic silicone alloy sealer	Water-repellent fungi and algae resistant coating to preserve natural appearance of

		clay tiles and bricks, concrete or cement substrates with wet look
LUSTERGLAZE	High gloss water resistant sealer	Clear thermoplastic binder for bricks, clay roof tiles with resistance to blocking, soiling, algae, fungi, mildew
PAVESEAL	Acrylic in low aromatic solvent	Clear seal coating for slate flooring, terracotta tiles, concrete paving, pebble paving
QUICKLINK	Cross linking agent	Cross linking agent for sealers to improve blocking, blanching, hardness, adhesion
TUFSEAL	Acrylic general purpose sealer	Clear initial coating for sealing bricks, porous or dense substrates with resistance to blocking, soiling, algae and fungi
<b>SECTION 3</b>	<b>TREATMENTS FOR CONCRETE AND SCREEDS</b>	
CONCURE	Waterborne synthetic rubber for concrete Curing	Applied on new concrete to form a membrane to be able to walk on it without damaging surface
DRYBLEND 100	Cement aggregate blended powder	Mixed with Tufcoat and applied on driveways with vehicle and foot traffic or anti-slip coating for concrete or steel stairs.
DRYBLEND 200	Cement aggregate blended powder	Mixed with Screedbond and applied on driveways with vehicle and foot traffic or anti-slip coating for concrete or steel stairs
LUBCRETE	Water reducing flow enhancing additive For concrete	Reduces water requirement of concrete by 25% and enhances flow and slip with cohesiveness
MOULD OIL CP	Concrete products release agent	Applied on fibre glass or steel moulds to be able to release product with smooth and hard surface finish
NYREO	Nylon fibre reinforcement for cement screed	Mixed with Screedbond/Cement screed to increase in flexural and tensile strength as secondary reinforcements
SCREEDBOND	Levelling and waterproofing screeds	Enhances bonding strength in mixes with cement improves adhesion to concrete, cement sheet, iron, tiles, bitumen and wood board
<b>SECTION 4</b>	<b>DAMP PROOFING &amp; MOTAR TREATMENTS</b>	

AQUAPHOBIC	Waterproofing for tiles & grouts	Water-repellent damp proofing agent for cement render, gypsum plaster, concrete, clay bricks
CALICONE	Acrylic silicone alloy sealer	Water-repellent fungi and algae resistant coating to preserve natural appearance of clay tiles and bricks, concrete or cement substrates with wet look
DAMP-PEL	Damp inhibitor & water repellent	Injected into building foundations to form a damp course and makes walls, paving, stones and lime stone water repellent
HYDROPEL	Waterborne silicone for concrete and clay bricks	Damp proofing product for concrete and bricks which allows substrates to breath with six month effectiveness
<b>SECTION 5</b>	<b>BRICK AND MOTAR TRATMENTS</b>	
CALHARD	Restores strength to concrete, stone and clay substrates	Hardens weak concrete surfaces, strengthens fretted bricks and mortar, restores friable stonework and terracotta
MARCSIL	Silicate silicone system for consolidating sandy soils and mortars	Hardens surface of soft fretting mortars, stops penetration of underground water
MXL	Motar pointing and tuckpointing	Complete replacement for water In cement sand mortars, grouts and thin screeds
<b>SECTION 6</b>	<b>ADHESIVES FOR TILES, CARPETS, VINYL AND FIBREGLASS MATTS</b>	
ELASTACRETE	Carpet adhesive	Waterborne latex adhesive to have grasp-like adhesion for jute, latex carpets
FIBRETAK	Elastomeric adhesive emulsion for glassfibre mat for membranes	Forms tough, resilient and flexible membrane to waterproof concrete, galvanized iron, chipboard, fibre cement sheet
KEYCRETE	High tack pressure-sensitive low viscosity adhesive	Primer sealer for high suction substrates like cement fibre sheet, gypsum paper board,
SENSORCRETE	Vinyl tile, rubber sheet and carpet adhesive	Waterborne acrylic adhesive for vinyl tiles on particle board, plywood flooring,

		concrete floors
SUPERSENCOR	High strength vinyl & carpet tiles, rubber sheet adhesive	Waterborne acrylic high strength adhesive for vinyl tiles, vinyl sheets and carpet tiles
TILECRETE	Ceramic tiles (one pack) adhesive	Waterborne resilient, flexible adhesive for laying ceramic tiles
VINYLCRETE	Vinyl sheet adhesive	Waterborne straight wet-lay adhesive for large areas of vinyl sheets
<b>SECTION 7</b>	<b>FAÇADE, WALL AND FLOOR CLEANERS ANDSTRIPPERS</b>	
EXCELCLENE	Calcium and vanadium stain remover	Removes mortar scum, calcium, tannin and vanadium stains from ceramic clay substrates
GEOCLENE	Irrigation stain remover	Removes mortar scum, grout scum, calcium or iron stains from clay bricks, terracotta tiles, granite.
GLEAMCLENE	Rust and calcium stain remover	Removes rust from iron, steel aluminium and rust stains from toilet bowls and glass
MARCMOVE	Degreaser, oil and paint remover	Removes mineral oil and greases from concrete or metal and adhesives and some forms of coatings
MAXICLENE	Iron and calcium stain remover	Removes mortar smudges, red rust and white calcium stains from clay brickwork.
NEUTRA	Acid neutralizer	Clear alkaline solution to neutralise mineral or organic acid residues
PHOSPHORIC ACID	Multi purpose acid	Used for etching concrete Surfaces, rustproofing and etching galvanized iron
STEELCLENE	Antioxidant rust remover from steel	Organic acid that removes rust from steel without harming steel or surrounding concrete
WIZ STRIP	Paint, laquer and graffiti remover	Comes in a solution and gel that contains biodegradable surfactant emulsifiers
